FOAM BOARD

**Quality that satisfies
the most demanding
Graphic Arts
professionals.**

Airplac® foam board panels are flat and square. They are pH neutral so that the longevity of mounted documents will be guaranteed.

The foam does not go yellow over time and the edges stay white. The surface papers have been chosen for their absolute whiteness or the elegance of the matt black. Using Airplac® foam board will enhance the look of your graphic and artistic projects.

**A manufacturer who
monitors its ecological
footprint.**

Throughout the manufacturing process of Airplac® foam board panels, the company selects raw materials that are in line with environmental criteria. The paper surface liners are sourced from European companies that are certified FSC or PEFC.

The factories that produce the foam board are committed to environmental policies and practices that include recycling polystyrene, geothermal heating and air-conditioning as well as collecting and compacting production waste for energy recovery.

Providing the best customer service

The complete chain of production of Airplac® foam board is fully integrated, from the raw materials to the speedy delivery thanks to a well-stocked warehouse and modern technology that optimises the process.

The result is a foam board panel that is always top grade with short lead times.

The added advantage is that we can also quote for non-standard sizes and offer bespoke panels. Our expert team can help you choose the right panel for your project.

Foam board know-how

Airplac® foam board was first manufactured in 1992 in France. The AERPANEL factory, in the beautiful Beaujolais region, is still the only French manufacturer of foam board. In the UK, our sister company in Leigh on Sea is the only UK based manufacturer of foam board for the graphic arts and visual communication markets.

unleash **your** **CREATIVITY**
and bring
your PROJECTS
to **LIFE**

PREMIER

Practical and versatile A lightweight rigid foam board
